HEALTH HAZARD INFORMATION

CARCINOGENICITY: None of the components of UNITANE[®] Titanium Dioxide is listed as a carcinogen by IARC, NTP, or OSHA.

EFFECTS OF OVEREXPOSURE: Exposure to this product for a short duration is not likely to cause adverse effects directly after exposure. Chronic overexposure to titanium dioxide may cause slight lung fibrosis. When titanium dioxide was fed to rats and mice for their lifetimes in a carcinogen bioassay, it was not carcinogenic. However, inhalation of titanium dioxide dusts at 50 times the nuisance dust level caused fibrosis and a slight increase in lung tumor incidence in laboratory rats.

SAFETY PRECAUTIONS: Avoid breathing dust. Use a dust filter respirator if exposure limits are exceeded.

EMERGENCY PHONE: 912/236-6171

FIRST AID MEASURES

INHALATION: If a large amount of the dust is inhaled, remove the person to fresh air. If not breathing, administer artificial respiration. If breathing is difficult, administer oxygen. Obtain medical assistance.

EYE CONTACT: Immediately flush eyes with a large volume of water for at least 15 minutes. Obtain medical assistance.

SKIN CONTACT: The pigment is not hazardous but washing the skin exposure areas after use is recommended.
